## Education

**Indian Institute of Information Technology, Nagpur** — Nagpur, MH
*Bachelor of Technology in Electronics and Communication Engineering* — *Aug 2024 – July 2028*

**Nano Junior College** — Hyderabad, TS
*Class XII (Board of Intermediate Education, Telangana)* — *May 2023*

## Experience

**Backend and Cloud Operations Lead** — Sep 2025 – Present
*Kazilen, IIIT Nagpur (Funded under E-Cell)* — *Nagpur, MH*

- Architected and maintained backend microservices using **FastAPI**.
- Implemented the three pillars of observability using **OpenTelemetry**, **Grafana**, and distributed tracing to monitor service health, latency, and error rates.

**Frontend Intern** — July 2025 – Sept 2025
*OwlFish Solutions* — *Remote*

- Developed internal dashboards using **Next.js**.

**Open Source Contributor** — Aug 2025 – Oct 2025
*GirlScript Summer of Code, Open Source Connect India, Hacktoberfest* — *Remote*

- Contributed to multiple open-source projects involving REST API optimization and frontend enhancements.

**Project Admin** — Jan 2026 – March 2026
*Social Winter of Code 2026* — *Remote*

- Managed contributor coordination and repository administration.

**Backend developer** — June 2026 – Present
*Vyom+ (IIIT Nagpur)* — *Nagpur, MH*

- Developed backend and cloud architecture for automated GST filing, with additional whatsapp bot support

## Projects

**KubeAid** | *FastAPI, Next.js, Kong, Kafka, PostgreSQL, Temporal, Helm*

- Developed an air-gapped, workflow-driven automation engine for SREs and Platform Engineers to execute operational playbook templates.
- Packaged the complete platform as a Helm chart for air-gapped deployments.
- GitHub: github.com/Gov-10/kubeaid. Helm chart: Coming Soon.

**Reliq** | *FastAPI, PostgreSQL, Qdrant, Prometheus, Kafka, OpenTelemetry, Next.js, Helm, networkx, Go*

- Developed an air-gapped operational intelligence platform that forecasts service degradation, computes blast radius using dependency graphs, and assists operators with AI-powered incident analysis.
- Used traces from the target system to develop dynamic state dependency graph generator service.
- Packaged the complete stack as a Helm chart for local air-gapped deployment.
- Used phi-3-mini as the local SLM and Qdrant for local AI service
- Architected the platform's core data-routing gateway in Go, seamlessly orchestrating async interactions between Kafka topics, Qdrant vector spaces, and local Ollama inference endpoints using thread-safe data pipelines.
- GitHub: github.com/Gov-10/reliq. Helm chart: coming soon

## Achievements & Leadership

Finalist – **AXIS'25 Web Reshape Hackathon, VNIT Nagpur** and **Innovortex DTU'25**.

Finalist – **India Innovates'26, Bharat Mandapam, New Delhi**

Top 12 – **Technex'26 IIT BHU Hack It Out**.

Finalist – **HackNation Global AI Hackathon @ Masters' Union**.

Rank 1 – **EY Techathon 6.0 First Round**.

**Bronze Medalist** – Interstate Lawn Tennis, ICSE School Games 2019.

Backend and DevOps Team Lead, Kazilen.

Zonal Rank 32 – **International Mathematics Olympiad 2021**.

Shortlisted for the Citadel Singapore SDE Intern 2026 Online Assessment.

1900+ GitHub contributions with 100% PR acceptance rate and three GitHub profile badges.

Co-led the Web and App Team at **E-Summit, IIIT Nagpur**.

## Technical Skills

**Languages:** Python, SQL, JavaScript, Golang
**Frameworks:** FastAPI, Django Ninja, Next.js
**DevOps:** Git, Docker, Kubernetes, GitHub Actions, Terraform, Helm
**Databases:** PostgreSQL, Redis
**Observability:** Prometheus, Grafana, Elasticsearch, Fluent Bit, Kibana, Loki, Jaeger, OpenTelemetry
**Cloud:** AWS (EC2, EKS, Lambda, Cognito, SES, API Gateway, S3), GCP (Cloud Run, GKE, Cloud Storage, Pub/Sub), Cloudflare Workers
**Testing:** PyTest, Postman, cURL
**Other:** Kafka, Redis Pub/Sub, Kong API Gateway, Istio, Envoy, LangGraph, Distributed Systems, Temporal, aiobreaker, Tenacity, Data Structures, OOP
